8. Soils	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
9. Revegetation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
10. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Purpose of Inspection:

Request from SITLA to inspect site while in area - SITLA had received complaint regarding this operation

Inspection Summary:

This Quarry was approved on July 20, 2006. Originally part of the Mayfield Quarry (S/039/011), the operator had been mining for. After a Cessation Order was issued for exceeding the 5-acre limit for a small mining operation, Bown Stone Products permitted the area outside the Mayfield Quarry boundary that they had disturbed. The site was active at the time of this inspection. During this inspection, it was noted that there was about 1/2 acre of additional disturbance from when the site was originally permitted, but this was still within the area outlined for the permit.

It was also noted during this inspection that trash, debris and potentially delitableous materials were cleaned up and/or properly stored. There were no erosional problems noted.

Photos were taken to document site conditions.

Conclusions and Recommendations:

This site appears to be in compliance at this time. It is recommended to continue to monitor this site when in the area.
